

Northwind Insights — Product Guide

Overview

Northwind Insights is a self-serve analytics product that lets business users build dashboards on top of their existing data warehouse without writing SQL.

Key Features

- Drag-and-drop dashboard builder
- Natural language query interface
- Scheduled email and Slack reports
- Row-level security integrated with existing SSO roles

Supported Data Warehouses

Northwind Insights connects to Snowflake, BigQuery, Redshift, and Postgres. Connection credentials are stored encrypted at rest using AES-256.

Pricing

Northwind Insights is priced per active user per month, starting at \$39/user/month for the Starter tier and \$89/user/month for the Professional tier, which adds row-level security and API access.
